

CV - Max Haponenko

Frontend Developer, Ukraine, Lviv

I'm a software engineer based in Lviv 🏙 with 5 years of experience in the software industry.

My focus area for the past 3 years has been frontend development with React, but I'm also skilled in UI/UX development. I am very quality-conscious because I spent my early career years in Product owner / Customer positions.

💻 Work experience

Frontend Engineer

TransferRoom, London, England – (Nov 2019 - Present)

Frontend engineer mostly responsible for UI/UX quality, new UI frameworks and CMS integrations.

Initially focused on components development from scratch using React, Redux, Redux-Thunk, SCSS. Took part in gradual migration to TypeScript and code base refactoring. Proposed and worked on scss to styled-components refactoring.

Performed coaching of junior / trainee developers joining the team. Proposed and implemented automated trainee studying program. At this moment it serves 5 trainee developers studying simultaneously during 2.5 months.

Took a leading position in the development of the new marketing CMS based website (Hubspot CMS). During initial development stage took part in regular meetings with London stakeholders: collecting requirements, UI discussions and managed dev process at all.

Regularly documented and created tickets for technical debt issues. Documented key frontend conventions and code / QA standards. Now I am responsible for keeping “wiki frontend” part up to date.

HTML/CSS developer

Ixioo, Lviv, Ukraine – (Jul 2019 - Oct 2019)

I got a job as a marketing manager, but over time I also started to perform frontend work:

- Responsive and cross browser layout
- Communication with the owner and partners exclusively in English (correspondence and live talk)
- Negotiation and communication with developers in upWork. Managing freelance orders

Co-Founder & UI developer

Quest Ground Ent., Lviv, Ukraine – (Nov 2016 - Oct 2018)

During this project I wore a lot of hats and closed a lot of different functionalities. Main responsibility was delivering product to the market and test business model for viability. Here is a list of responsibilities:

- Writing requirements for Unity, Frontend and Backend development
- Managing product development
- Interface prototyping
- UI/UX design development
- Frontend development
- Strategic sessions development

- Business modeling
- Communication with investor and partners

Co-Founder & HTML/CSS developer

ForPay, Lviv, Ukraine – (Aug 2013 - May 2014)

I was working with a partner, so we divided the responsibilities into two. Here is my part:

- R&D of the main business processes for key value proposition
- Interface prototyping
- HTML & CSS layout of the landing page from PSD

Co-Founder

GHOSTeL, Lviv, Ukraine – (Sep 2011 - Jun 2019)

The best and positive experience in business I had. I launched hostel which successfully works till nowadays. Here what I was doing related to frontend development:

- Writing the technical requirements for website development
- Communication with project manager as product owner during all process of development
- Q&A and writing tasks for edits
- Negotiating with SEO specialists

Technical Skills

JavaScript / TypeScript

My "native" programming language, I've worked with it for over 3 years. I've used it in the frontend with React and Redux. Also have experience working with Vanilla JS & jQuery within HubSpot CMS. Would prefer to use TypeScript rather than JavaScript.

React / Next.js

React is my choice. Also have experience working with Next.js SSG.

Redux & Thunk

Prefer to use redux with redux-thunk

Styled-components / SCSS

Don't like simple CSS. Best choice is styled-components or at least SCSS.

Soft Skills

Mentoring

I like sharing knowledge with others! During my career, I mentored three people on their way to frontend developer position. Also I organized mentoring program which successfully served 5 trainee developers simultaneously.

Documenting

I love to achieve code quality, generate generic principals/standards and document it, and I feel I can do a pretty good job about it! At my current company I have documented key frontend conventions and standards and now I took responsibility to keep "wiki frontend" part up to date.
